An investment in the Notes involves significant risks. Investors may lose some or all of their investment. The Notes are unsecured obligations of the Issuer and are subject to the credit risk of the Issuer. Past performance, including back-tested performance, of the Underlying is not a reliable indicator of future performance. The secondary market, if any, may be illiquid; a bid price, where available, may be up to 3.00% below the theoretical value of the Notes. A 10% decline in the Underlying does not translate into a 10% decline in the value of the Notes; the relationship is non-linear.
